An Equal Opportunity Employer

Indiana's non-seasonally adjusted unemployment rate for July is 4.1 percent, six-tenths of a percentage point below the national rate of 4.7 percent, Craig E. Hartzer, Commissioner for the Indiana Department of Workforce Development, announced today. The number of Hoosiers employed during July 2001 was 3,027,300.

Indiana's July unemployment rate was lower than Illinois, 5.4 percent; Ohio, 4.4 percent; Kentucky, 5.1 percent and, Michigan 5.3 percent.

"July saw Indiana's unemployment rate rise above 4 percent for the first time since February of 2000. This rate reflects a continued slowdown in our important manufacturing sector," commented Hartzer.

The monthly survey of 7,500 Hoosier employers reports payroll employment at 2,952,600, a decrease of 35,300 from one year ago. Payroll employment is an estimate of non-agricultural jobs in Indiana businesses. It differs from labor force employment which is used in the calculation of the unemployment rate by not including the self-employed and agricultural workers. In addition, payroll employment includes all those who work in Indiana, while the unemployment rate is calculated by those who live in Indiana.

Manufacturing employment totals 660,600 in July, a decrease of 30,300 from last year. Motor vehicle manufacturing accounts for 94,100 jobs, 9,200 less than one year ago. Manufacturing of motor vehicle parts totals 60,100. Industrial machinery manufacturing in July accounts for 71,300 Hoosier jobs, 1,200 less than June.

Construction employment totals 163,200 an increase of 1,300 from last month. Of that, heavy construction reports 20,000 jobs, an increase of 200 from June.

Service producing employment totals 2,122,800 in July, 5,200 less than last year. Transportation and public utilities total 149,200, the same as in June.

Retail trade totals 555,800, 7,600 less than a year ago. Of that, general merchandise stores report employment of 79,400, or 2,500 less than last year. Service sector employ-

(over)

ment, such as business services, computer and data processing, totals 754,700 in July, which is 4,800 more than the previous year.

Indiana's estimated labor force (the number of people 16 years of age and older who are able and available for work) totals 3,156,100 in July 2001. An estimated 3,027,300 Hoosiers are employed and 128,800 are unemployed.

## Industry Payroll Employment

Selected Categories	July 2001	Change from June 2001	Change from July 2000
Goods Producing	829,800	-5,700	-30,100
• Construction	163,200	+1,300	+300
• Manufacturing	660,600	-7,000	-30,300
Service Producing	2,122,800	-33,700	-5,200
• Retail Trade	555,800	-2,000	-7,600

Indiana's labor force for July 2000 totaled 3,134,700. Hoosiers employed one year ago is estimated at 3,025,300, and July 2000 unemployed in Indiana totaled 109,400. Indiana's estimated unemployment rate one year ago was 3.5 percent, compared with the national unemployment rate of 4.2 percent in July 2000.\*

\*Due to an expansion in the Current Population Survey (CPS), mandated by Congress, estimates for June 2001 (revised) and later at both the state and substate levels may not be fully comparable with those of earlier periods. In analyzing data, be aware that May to June 2001, including over-the-year comparisons, may differ slightly from comparisons that would have been made using data without the sample expansion. More detailed information can be found at <http://stats.bls.gov/launews1.htm>

## Indiana vs. U.S. Unemployment Rates July 2001
